

+ Care and Maintenance Instructions for  
**SOLID SURFACE  
MATERIAL**

*Shaping inspiration*

**ROSSKOPF  
+ PARTNER**

Solid surface material is dirt-repellent, robust and, therefore, very easy to clean. Due to its non-porous surface and gap-free processing, this is a very low-maintenance material. In order for you to enjoy your product, please note the following care instructions.

### **DAILY CLEANING**

**Removal of light stains and marks:**

Using a damp cloth or cleaning sponge and a mild detergent, rinse cleaning agents with clean water.

### **BASIC CLEANING + INTENSIVE CLEANING**

**Removing heavier soils (for example from wine, tea or coffee):**

1. Remove them easily with household bleach (exposure time up to 5 minutes).
2. Clean the surface with an all-purpose cleaner.
3. Rinse with clear water.

**Removing nail polish:**

Use acetone-free nail polish remover or a liquid scouring agent.

**Removing minor burn marks or nicotine residues:**

Use liquid abrasives or a scouring pad without metal parts, for example, a finely granulated cleaning sponge. After cleaning matte surfaces, they eventually return to their original shine.

### **ADDITIONAL TIPS**

- Do not use acidic cleaning agents (e.g., methyl chloride or acetone).
- Use coasters for hot pots and pans.
- When pouring hot or boiling liquids onto them, simultaneously allow cold water to run onto them as well.
- If possible, use a cutting board for cutting work.

### **OUR RECOMMENDATION**

**ROSSKOPF + PARTNER** Cleaning Set (2 microfiber cloths, 1 cleaning sponge, 500 ml Pro-Siro® Maintenance Cleaner Active, 500 ml Pro-Siro® Basic Cleaner Grease + Oil)
